Introduction

Hi my name is Matt,

I want to thank you for downloading the book.

I'm so glad you decided to make this purchase, and I hope you come away with some great ideas and information. If I can help people get ahead online it keeps me wanting to produce good quality content.

After having my own issues getting traction Fiverr I was finally able to figure out what worked and what didn't. I created this book in order to provide people with a platform to start earning on Fiverr if they've also been struggling to earn an income on Fiverr or money online in general. The first thing you need to do is figure out what Gigs you can sell and which ones are actually in demand and can make you a decent income. I've compiled this list of 101 ways you can get started today. Many of them don't require a large investment and lots of them you can do for free. This list is a beginning and will hopefully open your eyes to the amazing variety of Gigs you can offer on Fiverr. With your own expertise in life and business you may be able to run with many of these ideas and do fantastically on Fiverr.

Fiverr lets you create up to 20 Gigs on your account. I've personally seen that most of the people on Fiverr simply don't use up all these Gigs and they're literally letting money walk away from them. It can really make a difference to your possible earnings and if you want to make it big with Fiverr you should be filling out all 20 of those Gigs as soon as you can.

What you'll find in the following pages are a huge variety of Gigs you can get started on Fiverr. There are a variety of different categories with multiple Gig ideas in each category.

You may not know how to do all of the following things, but you can pick and chose Gig ideas based on your own personal strengths. Also, I've included ways to learn and places to find information for many of these offerings. You'll be amazed how much you can do and learn in a short amount of time and you'll be off to the races.

In this book I'm providing you with awesome ideas you can use to create Gigs

and also how you can start selling them. This isn't a book about Fiverr Gig creation or optimization though, for that you'll want to grab my book "Fiverr Money Secrets." In that book you'll find how you can use Fiverr to generate a full time income with simple \$5 Gigs by optimizing your selling system.

Lets get into the meat and potatoes of this book, 101 Ways to Make Money with Fiverr.

Web Development

If you're handy with web-design or even can do some simple things like installing Wordpress there are lots of in demand Gigs in this niche. If you're good with Wordpress then there are a lot more than even these you can get into. Just make sure you're not trading too much time for the money.

1. Install WordPress Securely

This is something I started offering almost right away on Fiverr. Even though it's quite easy with most web hosts to 1 click install Wordpress, many people don't know this. So you get them to sign up for their own hosting, or you can add that as an extra, and then you go in and setup their site and install a plugin like [Wordfence](#) to secure it.

2. WordPress Migration

Transferring someone's Wordpress installation from one host to another may seem complicated but it's actually quite easy. Using a plugin on Wordpress called [WP Clone](#) you can have it done in no time. Just install Wordpress on the new host, install the plugin, then copy the link from the old host into the plugin. Done. And you'll be saving a lot of people from a big headache.

3. Customize Wordpress Theme

I know this irked me the first time I bought a premium Wordpress theme; it didn't look like the demo version did! There are some simple ways you can help people get their site looking right. Or if you're great with Wordpress then offer to customize someone's theme for them. Upsell with Gig extras and even offer customized orders if you're up for it.

Social Media

Many people come to Fiverr in search of social media Gigs. It may seem saturated but there is always room for more offers. Help people gain followers, get views, likes, or even repins. This final set of ideas can be an persons entire 20 Gigs. In fact, you can pretty much automate this altogether with the right tools (such as Fiverr Automatic Seller). If you really want to start making fast money on Fiverr then you'll want to get into selling digital products that you can quickly deliver. What you'll want to do is find Gigs that people want, including some of the ones listed above, that you can turn into tutorials. For instance, you could teach people how to install Wordpress. This means that you're selling a product that you've already made and then you can upload it to them ultra fast. Then you'll want to either make PDF reports or Videos, or a combination of both. You can then simply simply sell the tutorial on Fiverr as a Gig and when the order comes in, you just hit the upload button and you're done.

There we go! 101 hot selling ways you can actually start making money with Fiverr.

Final Thoughts...

As you can see, there are a plethora of ways you can make money on Fiverr.com with Gigs. This list isn't even exhaustive. If you're serious about trying to make a full time income or even some extra cash every month then you should start today. Select a handful of Gig ideas you can feel good about creating and run with them. When you can add more Gigs, do. Pretty soon you'll have your hands full of orders. I'll leave you with some final advice on Gigs that will hopefully help you make even more money with Fiverr.

I've included below a little bonus section on how you can get your Gigs to the top of the list and featured on Fiverr's homepage.

1. Appeal to The Masses

Fiverr's homepage is only so big but they like to showcase the wide range of offers they have. When someone first lands on Fiverr.com they get their first glimpse of the massive variety. You want to offer something that appeals to the widest variety of people.

2. Offer Great Value for \$5

Gigs that offer great value to people are what's necessary to complete the rest of this list.

3. Convert

Fiverr's algorithm watches Gig conversion rates over a 30 day period. The higher percentage of people viewing an offer in that period the better. And if your Gigs are converting well then Fiverr stands to make more money. So they make sure you also make more money by putting you in front of more buyers.

4. Get the Most for the Least

Use your Gig Extras as much as possible. You want to add value to every Gig and get the most money for each order.

5. Positive Feedback

You really want to make sure you're getting excellent feedback the whole time. Deliver quality Gigs and ask for reviews from your buyers. Keep that bar as close to 100% as you can. When you've had a multitude of good reviews you'll be more likely to end up on the homepage.

One last thing, anyone lower than a Level 2 isn't likely to get featured on the homepage. Once you hit Level 2 it means you had 50 orders over a 60 day period. So advertise yourself, sell your Gigs and keep those orders coming.

Last but not least, if you've found some of these ideas to be perfect for you but you don't know where to start with Fiverr Gig creation, just do a search on Fiverr itself. You'll find that all of these Gigs exist in some form or another and they can be great templates themselves. Don't copy people's Gigs exactly (it's against Fiverr's TOS) but use them to get your Gig started.

Fiverr can be an awesome way to make some extra cash or start your online money making "career." So get out there, get creative and start today.

Here's to your success!
